

Spreading Activities and District Net's Leader Election

Translated By: Mr. NOY KIMHONG, FNN W.W

Having supported by EED Germany, in the late July and in the early August 2010 president, staff, director, and provincial BOD of FNN have held the activities regarding the spreading activities and organized district net leader election in 8 target provinces and 19 target districts.

In each activity chief, vice-chief, member, association, cluster, SOSOR, chief village, chief commune, commune council, district governor, district council, and CEDAC's assistant in the target provinces were there. Totally the number of participants was 595 (195 women). As a result, FNN has elected 7 districts, 6 districts in Takeo and 1 district in Kampong Speu from 19 districts.

The main objectives of these activities were to have the leader for leading and managing, to have strong and reliable representatives, to find the support for farmers and farmer association. All in all, we want farmers and farmer association to lead themselves rather than depending on the support and sponsor from the other project and NGOs. It means that even the project has phased out, but they can govern and lead themselves.

To be noted that, 23 districts, up to now, have elected and 14 districts have guided. In 2012 the project objective plan to have 50 districts. Uploaded by Noy Kimhong, FNN reporter and Writer
